

Property Description

For Sale - Blackmans Plantation is an unbelievably beautiful property set within the Barbados countryside, reflecting the elegance of days gone by.

The grounds are just under 8 acres of beautiful, lush gardens with a gully to one side and a row of spectacular mahogany trees on another. The property includes a small field used to farm local produce, another patch growing magnificent flowers which are often included in the Chelsea flower show and many mature shade trees.

There are two large houses on the property, completely separated and equally lovely. Each of the 2 houses feature 4 bedrooms and are both in very good condition. They are of the typical, highly sought-after Plantation-style.

Blackman's Plantation is a magnificent property well worth a look.
